

AI-Ready Leadership

Safe AI adoption for the owner who has to lead it.

The promise. You will leave with a private, governed, ROI-first plan to put AI to work in your business, and the confidence to lead your team through it.

Who it's for

Owners and executives who are being told to adopt AI but have not been shown how to do it safely. If everyone keeps telling you to use AI and you have no idea where to start, or you are worried about your data leaking, this program is built for you.

The core curriculum

Six modules, built around the three things that actually stall AI in a business: messy data, untrained people, and a leader with no roadmap.

- | | |
|------------------------------|---|
| 1. See It Clearly. | AI without the hype. What it is, what it is not, and what it can realistically do for a business your size. |
| 2. Keep It Safe. | What data can leave your building and what must never. Public tools versus private. A simple, one-page AI use policy your team will actually follow. |
| 3. Find the Money. | How to spot the two or three AI uses that pay in your specific business, and ignore the rest. A prioritization scorecard, so you invest where the return is real. |
| 4. Own It or Rent It. | When a subscription is fine, and when a private build you own beats renting a seat forever. The true cost of both. |
| 5. Bring the Team. | Adoption is a people problem, not a software problem. How to train your crew, set a prompting standard, and build the habit so results stop being random. |
| 6. Measure and Scale. | Track ROI, run a 90-day rollout, and put governance in place that sticks. Every leader walks out with a written roadmap in hand. |

Your industry track

The core is the same for everyone. Then we bolt on a track for your world, so the examples and use cases are yours, not generic.

AI for Builders. Bidding and estimating from your own job history. Finding work first through permits and new licenses. Protecting client and pricing data in every bid. Change orders, scheduling, and project risk. Jobsite AI with a human still in charge.

Additional tracks rolling out by demand: Real Estate, Marketing Agencies, Insurance and Financial Services, Accounting, IT and MSPs.

How it works

Start with a free 60-minute AI Readiness for Leaders session. No cost, no obligation. From there, the flagship is a small executive cohort, four to six weeks, capped to stay hands-on, with an AI Suitability Assessment as your intake step. Cohorts are kept small on purpose.

Dr. Zubia Mughal, Ed.D. An instructional designer with a doctorate in workforce development, who also builds private AI. So this is not theory. You learn from someone who builds the real thing.

Dr. Data Decision Intelligence

Own your AI. Don't rent it.
